PROFILE

Software Engineer and founder of NextApps, focused on full-stack development and building scalable web applications and SaaS products. Experienced with React, Next.js, TypeScript, Node.js, and PostgreSQL, with a strong interest in product development and AI-powered applications.

SELECTED PROJECTS

Dofixo · Multi-tenant SaaS 2026

A hosted platform for small phone, laptop, and appliance repair shops. Each workshop gets an isolated workspace to manage operations from device intake to invoicing and profit reports.

- Enforced tenant isolation through a Prisma extension that injects workspace IDs into queries, backed by PostgreSQL Row-Level Security (RLS).
- Propagated workspace context from verified JWTs through AsyncLocalStorage into PostgreSQL set_config, never from request bodies.

Tech Stack: React 19 · TypeScript · Node.js · Express 5 · PostgreSQL · Prisma · Tailwind CSS 4 · Docker · Astro

Finora · Open-source product 2026

A Persian-first household finance manager with RTL support, a Jalali calendar, and self-hosted data storage.

- Derived account balances from transactions, with transfers excluded from spending calculations.
- Implemented loans with automatic instalment schedules, recurring payments, rollover budgets, savings goals, and asset price history.

Tech Stack: Next.js · TypeScript · Prisma · PostgreSQL · Radix UI · Tailwind CSS · GSAP · Three.js · Recharts · Docker

Secure Assessment Dashboard · Full-stack app 2026

A full-stack dashboard for organizations to track security assessment projects and their findings, with organization-level data isolation and role-based permissions.

- Enforced tenant isolation using organization IDs from verified access tokens; records belonging to other organizations return 404 to prevent existence disclosure.
- Implemented role-based access control, with route-level permissions enforced by the API and UI actions determined by API-provided permissions.

Tech Stack: Next.js 16 · React 19 · TypeScript · NestJS 11 · PostgreSQL · TypeORM · Redis · Tailwind CSS 4 · Docker · Turborepo

NextApps · Founder · Studio website 2026

Founded NextApps, a small digital product studio building websites, online stores, web applications, and SaaS products. Dofixo and Finora are part of its product work.

- Developed a Persian RTL studio website featuring services, pricing, case studies, and blog sections.

Tech Stack: Next.js · TypeScript · Tailwind CSS

SieManage · Full-stack app 2025

A task management system where managers assign and track work while employees manage their daily tasks, with real-time notifications and a bilingual Persian/English interface.

- Implemented JWT authentication with Manager and Employee roles.
- Built WebSocket notifications for assignments, status changes, approaching deadlines, and overdue tasks, driven by scheduled jobs.

Tech Stack: React · Node.js · Express · PostgreSQL · Socket.io · Tailwind CSS · i18next · Docker · Nginx

SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, Redux, React Router
Backend	Node.js, Express, NestJS, Prisma, TypeORM, Socket.io, Zod
Database	PostgreSQL, Redis, MongoDB
UI & Styling	Tailwind CSS, Material UI, Radix UI, Sass
Animation & Graphics	GSAP, Framer Motion, Three.js
DevOps & Tools	Docker, Nginx, Caddy, Git, GitHub

EDUCATION

B.Sc. in Computer Engineering
Azerbaijan Shahid Madani University · Tabriz, Iran
